

CONGRESSIONAL DISTRICT BOUNDARIES - 2010

Data Availability:

 State complete

Data Layer: CONGRESSIONAL DISTRICTS 2010

Primary Layer Name: CONGDISTRICTS2010
Layer Content: CONGRESSIONAL DISTRICT BOUNDARIES - 2010
Data Structure: VECTOR
Layer Type: POLY, LINE

Source: DIGITAL LINE GRAPHS, USGS
Source Scale: 1:24,000/1:25,000
Source Media: DIGITAL

Automated By: COMPLEX SYSTEMS RESEARCH CENTER
Coordinate Reference: NH State Plane Feet
Horizontal Datum: 1983
Tile: STATE

Status: COMPLETE
Last Revision: May, 2012
Available From: Complex Systems Research Center, UNH

Associated Coverages: N/A

GENERAL DESCRIPTION

The CONGDISTRICTS2010 data set contains New Hampshire's US Congressional District boundaries, based on redistricting after the 2010 US Census.

Towns in each district were retrieved from the NH Secretary of State's (SOS) web site on May 4, 2012 (http://sos.nh.gov/Voting_Districts.aspx). Using the SOS listing, a district code was assigned to each city/town in the state. The data set was then "dissolved" to derive the Congressional District boundaries.

The underlying geometry utilized the PBNH coverage, which in turn is based on 1:24,000 mapping by USGS.
