Source Media: PAPER

Automated By: NH OFFICE OF STATE PLANNING
Coordinate Reference: NH State Plane Feet
Horizontal Datum: 1983
Tile: STATEWIDE

Status: IN PROGRESS
Last Revision: February, 1996
Available From: Complex Systems Research Center, UNH

GENERAL DESCRIPTION

The New Hampshire Old Graveyards Association has mapped the locations of historic graveyards by town within the state. The mapping is performed on the basis of data submitted by individual communities, and thus the quality and completeness of the records will vary considerably across the state.

The data is now being automated at the Office of State Planning, and integrated into the GRANIT database. The graveyard site attributes include the site name, the town name, the road name and the information source.

Graveyards larger than 1 acre are mapped as polygons, and are archived in GRAVENH. The companion coverage, GRAVEPTNH, contains point locations for smaller cemeteries in the state.
