Coordinate Reference: NH State Plane Feet
Horizontal Datum: 1983
Tile: STATE

Status: COMPLETE
Last Revision: 2012
Available From: Complex Systems Research Center, UNH

Associated Coverages: NHHouse2012Flot ("Floterial" districts)

GENERAL DESCRIPTION

The New Hampshire House of Representatives District Boundaries, 2012, contains "base" district boundaries drawn by the New Hampshire Legislature based on the 2010 US Census population count. Companion shape file NHHouse2012Flot contains boundaries of NH House of Representatives "floterial" districts, which overlay the base districts. Both data sets are required to depict all NH House of Representatives districts.

District boundaries were derived by applying district codes retrieved from the NH Secretary of State web site to the geometry provided by the GRANIT town boundary layer (PBNH). For sub-municipal districts, ward boundary maps and descriptions were obtained from city offices, and the districts were mapped by extracting appropriate base features (roads, streams, etc.) from GRANIT base map layers.
